### Description

This playful and imaginative series of ceiling lighting fixtures are identical to Alulite wall & ceiling models but with adjustable dichromatic mirrors/filters. Available in a variety of colors, the filters reflect one color and pass through its complement, thereby enabling countless combinations of colorful lighting effects to be cast on walls, floors, signs and merchandise. Depending on the proximity and angle of the light source, the reflections can be configured as a spot or flood distribution. Filter colors can be mixed as desired and exchanged at any time by simply snapping in and out.

### Features

**Lamping** None

**Construction** Machined solid aluminum with glass bead-blasted finish (matte)

**Mounting** Surface mounted on ceiling or wall; pendant model available

**Dimensions** see below

**Designer** Dietmar Weickert
